

Product Catalogue

A single brand, for a single market.

With *Papernet Sustainable Hygiene*, the Sofidel Group comes on the market offering a single, recognisable, young identity destined to become top-of-mind for large and small customers.

Papernet and sustainable hygiene intend orienting purchases through simplicity and offer solutions that make the brand different from its market competitors. Choosing Papernet means choosing sustainable hygiene while combining top environmental performance with top hygienic performance.

Papernet is a brand of the Sofidel Group.

www.papernet.com

SOFIDEL. A CORE THAT EMBRACES HALF A CENTURY OF INNOVATION

Making everyday life tidier, cleaner, safer, more practical and pleasant by investing in people and innovation and promoting conduct based on sustainability, commercial transparency and respect for regulations, with the aim of creating value for customers, employees, partners, shareholders and the community.

‘60 | ‘70 The origins and productive leadership in Italy

1966 | *Emi Stefani* and *Giuseppe Lazzareschi* set up business with their first paper mill, *Stefani & Lazzareschi*.

1969 | *Fine Paper mill* is born. The Group started producing two-ply paper there.

The consumption of paper for sanitary and household use increased throughout the country. Converting plants to offer the finished product started being regarded with interest, in addition to paper production.

1972 | *Soffass* was set up.

1979 | *Delicarta* was set up.

France and Germany became the new European horizon, being close not just geographically but also as models of habits and consumption.

‘80 | ‘90 The European market and the launch of *Regina*

1982 | The Group's production capacity reached 140,000 tons per year.

1987 | Launch of the new brand *Regina*, *Rotoloni* (Big Toilet Rolls) and *Asciugoni* (Big Kitchen Rolls) also. The TV ads claim was "*Regina, la carta più*".

1988 | *Sofidel* was set up. Sofidel is the acronym of *Soffass (So)*, *Fine Paper (Fi)* and *Delicarta (De)*.

1997 | Start of construction of *Delipapier*, the Group's French company. This was the first step in a strategy of being close to customers to be replicated in several countries.

In the meantime, in Italy, Sofidel entered the Away-From-Home market by setting up the Papernet company. By then the Group's presence was established in all business lines.

2000 | Today

Sustainability, international expansion and the USA

2000 | These were the years of large greenfield investments. Sofidel built a series of integrated plants, first with ***Delitissue***, in Poland.

2001 | In 2001 the Group carried out two important rationalisation initiatives: in August, the merger of Soffass and Fine Paper into Soffass S.p.A.; in December, Sofidel changed from a service company into a holding of Group Companies.

2003-2006 | All at the same time, ***Intertissue*** in Great Britain, ***Ibertissue*** in Spain and ***Delipapier*** in Germany were established.

2004 | The Group's development continued in Turkey, with the takeover of ***Sofidel Kagit*** and in Germany, by setting up the trading company, ***Delisoft***.

2006 | A new paper converting firm was acquired in Buxeuil, France.

2007 | Purchase of the historical ***Werra group*** in Germany's Thuringia region, well-established in the ***Away-From-Home*** segment.

Production went from 458,000 to 583,000 tons/year.

2008 | Sofidel drew up a Sustainability Charter. It joined the international ***WWF Climate Savers programme***.

2009 | The Group entered the Greek market by acquiring ***Papyros***.

Geographic expansion goes hand-in-hand with production growth in Italy with the acquisition of the Monfalcone paper mill and Imbalpaper, the first integrated plant in Italy, which also brings as dowry a number of customers in the Away-From-Home sector.

2012 | Sofidel landed in the USA and acquired the company Cellynne, which became ***Sofidel America***. A new converting plant was opened in Oklahoma (Tulsa) and the Nevada one was upgraded.

2013 | Five years after joining the international WWF Climate Savers Programme, the Group achieved its pre-set objective of ***reducing CO2 emissions by 11%***.

2014 | The "***Less is More***" principle was introduced: to give "more" in terms of values, products and services, "at less", in terms of consumption and waste.

2015 | Acquisition of a plant in Wisconsin (Green Bay) and Mississippi (Hattiesburg). The Group carried out a new greenfield investment in Ohio (Circleville). It opened new offices in Pennsylvania (Philadelphia).

In just three years, Sofidel established a presence in 7 States with a productive capacity of 200 thousand tons.

The future | Sofidel has set even more ambitious objectives for 2020: reducing direct and indirect specific emissions, increasing the use of renewable energies and to carrying out an active role in fostering the ***Low Carbon Economy***. Happy Future!

50 years in defence of hygiene and sustainability

The Sofidel Group is a major Italian company, a world leader in the production of paper for hygiene and domestic use. It was born in 1966 from the passion and values of the Stefani and Lazzareschi families. Through investments in research and innovation to enhance the quality of life and comfort in the home and in social environments in general, the Sofidel Group has always focused **great attention on the social and environmental aspects** of its way of working. From a product's sourcing to its end-of-life phase, **every single choice is aimed at safeguarding people's hygiene** and improving the effects of the impact of production cycles.

Sofidel considers environmental safeguard a foundational strategic asset for its development.

Less is More

is our guiding philosophy

The “Less is More” principle perfectly summarises the approach to work done by the Group: persevering to create added value; maximising and optimising efficiency, whilst reducing any negative impact to a minimum and dedicating the utmost attention to the needs and requirements of stakeholders.

A SINGLE BRAND, FOR A SINGLE MARKET

Papernet is the Sofidel Group's brand for the Away-From-Home segment of the Tissue market.

It has witnessed rapid growth also on the professional market, quickly attaining a leadership position in the transport field of boats and trains, and has customers in Europe and throughout the world.

Papernet is also - and above all - **Sustainable Hygiene** with a unique identity, young and recognisable, that merges top environmental performance with top hygienic performance. Strong strategic values that have allowed to create a highly effective professional product, manufactured in full respect of the environment and of energy savings.

The result is a full range of specific, technologically advanced products such as **Dissolve Tech and Bio Tech** that stand out on the international market in virtue of their exclusive, leading-edge technical characteristics that see them protagonists in fields and situations with drainage problems or limitations.

Papernet is a flexible brand, capable of providing answers to every customer and for every need, offering a broad range of products articulated on different levels of quality.

Superior

Top tier products that stand out for their high performance levels.

Special

Everyday products that assure good performance in an optimal quality/price ratio.

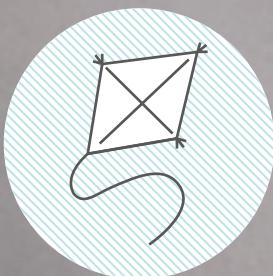

Standard

Young products, ideal for daily and large-quantity consumption.

Thanks to a simple, clean packaging that associates a colour to each different quality level, Papernet is easy to recognise and to choose: just find the right colour and choose the products most suitable to your needs.

PAPERNET SUPPORTS DOCTORS WITHOUT BORDERS

With 100.000 measles vaccines
**we are saving the lives of 100.000
children together.**

1 vaccination is sufficient to save a *child's life*

10 out of 100 children die from measles complications.

Papernet retains that every company has the moral obligation of embracing and concretely solving the problems affecting the more disadvantaged areas of the world.

Niger holds the sad ranking of penultimate country in the world for social and economic development, and it is one of the places where children suffer most of all.

For this reason we have decided to work together with Doctors Without Borders in this context, offering one-hundred-thousand measles vaccines. Papernet thus makes a consistent commitment, renewed year-on-year. Thanks to initiatives like this, from 2000 to 2012 the number of deaths from measles has decreased from 562.000 to 122.000.

To strengthen the anti-measles initiative in Niger, we have decided to use our products' packaging, in the hopes that other companies will follow suit.

A PATH TO RENEWAL

It is not the strongest of the species that survives, nor the most intelligent. It is the one that is most adaptable to change.

[Charles Darwin]

2016 is an important year for us.

Sofidel turns 50 years old and Papernet, its Away-From-Home division, strengthens its identity on the tissue market.

2015 results were excellent, above all for high value-added products such as **Dissolve Tech** and **Bio Tech** that have allowed us to conquer the trust and loyalty of many customers.

These results have heightened our conviction that we must **shift the focus from selling a product to selling solutions** to the needs of our customers.

For this reason, we have also renewed our communication: the new catalogues, the leaflets and the website are designed to communicate our goals and our values clearly and effectively.

The catalogue starts with our history to tell about the depth of our product ranges and to guide in the discovery of increasingly innovative solutions.

The organization of the information supplied allows underscoring, through **highlights**, the success factors of our spearhead products and to facilitate access to technical data comparison.

In addition, through images, we have contextualized our products and actual situations of use.

Papernet: a step together towards the future.

Dissolve Tech

Bio Tech

Hy Tech

Dry Tech

Double Layer Tech

Full Tech

Resistant like a hand towel, dissolvable like toilet paper

Dissolve Tech reduces the risk of **clogs** and helps save on maintenance costs

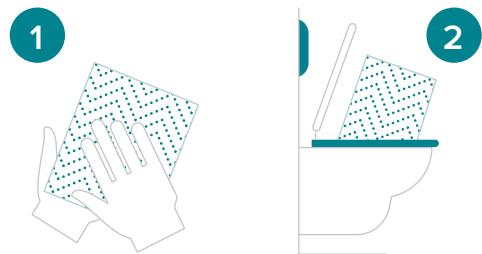

Dissolve Tech is a Papernet exclusive product that owes its original formula to years of scientific research and technological innovation.

Dissolve Tech is **resistant** like a hand towel and, if accidentally thrown in the WC, **dissolves** like normal toilet paper.

Its performance has been **scientifically tested** by the most prestigious research institutes, such as the Centre Technique du Papier in Grenoble (*).

(* for in-depth scientific details, consult www.papernet.com

Resistant
like a traditional hand towel when drying hands.

Dissolvable
like normal toilet paper if thrown in the WC.

It dissolves **in less than 3 minutes**, preventing clogs

Normal hand towels Flushable hand towels Dissolve Tech hand towels

How it works

The natural microorganisms are activated when the paper comes into contact with water.

The natural microorganisms reproduce, multiplying the cleaning effect exponentially.

Once the agents have completed their action, they biodegrade with no impact on the environment.

WHY BIO TECH?

HIGHLIGHT

Bio Tech is a product by Papernet that uses Biologic Active Tissue Paper technology exclusive in Europe.

It is an innovative toilet paper containing 5 types of natural microorganisms (harmless for people and for the environment) that, upon activation through contact with water, produce enzymes that feed on the incrustations and organic substances present in pipes.

Bio Tech is the toilet paper that **reduces odours and the effects of dirt**.

In just 4 weeks, Bio Tech contributes to keeping sewerage systems, septic tanks and inspection pits clean.

Substantially **reduces extraordinary maintenance costs, costs for cleaning and other chemical/mechanical interventions on sewerage systems**.

The dispensers that safeguard our health with style

The Hy Tech line is made of **highly resistant** plastic material that **make it last in time** and **reduce maintenance costs**. Thanks to its compact shape, the large surfaces and rounded corners, it is **easy to clean**.

The Hy Tech Antibacterial line is enriched with silver ions that protect from germs and pathogenic agents. Upon contact with bacteria, the silver ions eliminate them in just a few minutes.

DRY TECH

Quality

Special

DOUBLE
LAYER  TECH

Double thickness that protects you from double costs

Thanks to its **drying technology**, it offers **100% more absorbency** compared to normal paper: **less paper consumed, less waste,** and a **cleaner environment.**

The long fibres give strength

The short fibres give softness

You can store a greater quantity of product in the same amount of space. So the products are ideal for high foot traffic locations and that have limited storage areas.

Features of our dispensers

The Hy Tech Antibacterial line is enriched with **silver ions** that **protect** from germs and pathogenic agents.

Upon contact with bacteria, the silver ions eliminate them in just a few minutes.

The dispensers
that **safeguard our health**
with style

The Hy Tech line is made of **highly resistant** plastic material that **make it last in time** and **reduce maintenance costs**.

Thanks to its compact shape, the large surfaces and rounded corners, it is **easy to clean**.

HIGHLIGHT

WHY DOUBLE LAYER?

The long fibres
give strength

The short fibres
give softness

DOUBLE LAYER  **TECH**

You can store a greater quantity of product in the same amount of space. So the products are ideal for high foot traffic locations and that have limited storage areas.

WHY DRY TECH?

Dry Tech is the paper dried with hot air, a process that enhances its absorbency and softness.

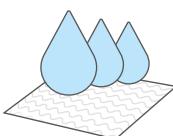

Thanks to *Through Air Drying technology*, Dry Tech guarantees **100% more absorbency** and **67% more resistance** compared to normal paper.

Dry Tech is bulkier and softer thanks to its internal air pockets that guarantee extremely high wet and dry strength and top reliability.

Absorbs faster and saves time.

1 **67% MORE RESISTANCE**

2 **100% MORE ABSORBENCY**

3 **SOFTER**

4 **REDUCES PAPER CONSUMPTION AND LOWERS COSTS**

HIGHLIGHT WITH DRY TECH YOU SAVE MONEY

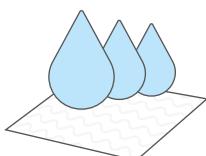

Dry Tech substantially reduces excess use of paper, refilling operations and the production of waste. By absorbing greater quantities of liquids, it greatly reduces paper consumption and supply costs.

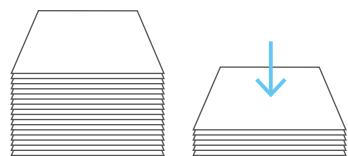

67% MORE
RESISTANCE

SOFTER

100% MORE
ABSORBENCY

**REDUCES PAPER CONSUMPTION
AND LOWERS COSTS**

UNIVERSITY OF
WESTMINSTER

The World Health Organization and the prestigious University of Westminster recommend the use of paper hand towels, given the substantial reduction of bacteria on hands.

Papernet products certifications

Bio Tech, in 2012, received the **Chelab BATP certification** as dermatologically tested product. **Chelab Silliker**, part of the Mérieux NutriSciences Corporation, boasts a proven expertise in analytical services in chemistry, microbiology and biology with a high technical-scientific specialisation.

In 2013 **Bio Tech** received certification by the prestigious **SGS Institut Fresenius**, Taunusstein (Germany) regarding the beneficial enzyme activity of BATP spores. SGS is the world's leading inspection, verification, testing and certification company in Germany.

The jury of the 2015 edition of the **PPI Awards** has selected **Papernet Bio Tech**, the biologically active toilet paper, as "Innovative Product of the Year".

The 2015 PPI Awards is the only global honor dedicated to recognizing the achievements of companies for leadership, vision, innovation and strategic accomplishments within the pulp and paper sector.

The Centre Technique du Papier in Grenoble, in September 2014, proved the dissolvability of **Dissolve Tech** paper after 3 minutes of contact with water.

The Centre Technique du Papier in Grenoble is an industrial research and development organisation that provides scientific support to the paper industry.

Dissolve Tech is the 2016 Sanitary Maintenance Distributor Choice Award Winner.

The Distributor Choice Award program recognizes the most innovative and useful sanitary supply products of the year, as determined by distributors active in the sanitary supply marketplace, including janitorial, paper, food service, industrial and wholesale.

Certification bodies of our products

Forest Stewardship Council®

It is the certification system for forests, wood and derived products that ensures that the products come from forests managed pursuant to strict environmental, social and economic standards.

The Forest Stewardship Council is the non-profit organisation born in Mexico in 1994 and transferred to Bonn in 2003 that issues the certification necessary in order to be able to use the label on the basis of audits performed on the forests where the wood is extracted and in the course of all subsequent production phases, down to the consumer, and that concern environmental and social-ethical aspects.

It is a label similar to Type I for the existence of a third certification body.

The FSC forest management principles can be summarised in ten points:

1. respect of national laws and international agreements;
2. recognition and respect of indigenous people's rights;
3. protection of property rights and of the use of forest resources;
4. respect of the rights of workers and of the wellbeing of the local communities;
5. equitable use of benefits derived from the forest;
6. safeguard of environmental impacts (preservation of biodiversities, landscape, etc.);
7. actuation of a forest management plan;
8. monitoring and assessment of the forest and its management;
9. safeguarding the forests of high environmental value;
10. attentive management of the plantations.

Although the numbers are continuously on the rise, for an idea of the vastness of the FSC label, we should consider that currently, about 72 million hectares are certified in the world in over 790 locations; that means 13.000 product lines certified, for a global market of over 5 billion US\$.

In Italy, the FSC-Italia group was created in 2001 and counts 60 members. It supports the dissemination of the FSC system through training, information and technical assistance, to attain good forest management standards both in the Alpine region and the Apennine and Mediterranean forests. Currently, in Italy, about 43.000 hectares are certified and the label is found on about 500 products wood and derived products, among them, flooring material, paper and cellulose, furniture doors, windows and doors, panels, toys, utensils, etc...

Nordic Ecolabel

The Nordic Ecolabel is a voluntary, positive ecolabelling of products and services with a common Nordic registered trademark, the Nordic Ecolabel. Its purpose is to give consumers a clear and concise environmental product information, as well as promoting the development of products that are environmentally sound. The Nordic Ecolabel vision is a sustainable society and the mission is to contribute to a sustainable consumerism.

The Nordic Ecolabel adopts criteria for the use of chemicals, the amounts of air and water pollution to make the products, as well as energy usage and waste procedures.

The Nordic Ecolabel is the official ecolabel for the Nordic countries and the EU Ecolabel is its EU equivalent. Both systems work in similar ways with a lifecycle perspective and continually review criteria. They are often synchronized.

<http://www.nordic-ecolabel.org/>

EU Ecolabel or EU Flower

Ecolabel is the voluntary Type III ecological label recognised on a European level. It is a stylised daisy with the "E" of Europe at its centre, surrounded by stars representing the Member States.

It was created by the European Commission in 1992 as a quality label awarded to product and service categories respecting precise ecological criteria.

In particular, it indicates that the product guarantees a reduced environmental impact at every phase of its life cycle.

For every product, the environmental aspects connected to its production are taken into consideration: the quality of the air, the water and the soil, waste production, resource and energy consumption, noise pollution, protection of the biodiversity.

According to the principle of shared environmental management, the new Ecolabel Regulation 2010 establishes that the criteria adopted by the Commission are proposed by an Ecological Label Committee (CUEME) that sees the participation of all interested parties: Industry and SMEs, Consumer Associations, Environmental Associations.

And the attention placed on the entire life cycle allows reducing the overall environmental impact, preventing the mere transfer of impacts from one phase to another. Through the Ecolabel, the consumer has access to reliable and scientifically based information on the products' environmental impact. Additionally, Ecolabel products guarantee effective product quality.

The Blue Angel

Blue Angel products meet a list of criteria considering environmental and health-related aspects. The purchase of a Blue Angel-labelled product is a guarantee of good products with less environmental impact and greater health protection than many other products serving the same purpose.

The main criteria for Tissue Paper is that the raw materials is made by 100% recovered paper (Recycled); in fact, Blue Angel suggests that a paper product made from 100% recycled paper saves the entire raw material required for virgin fibre paper production.

Such action does not only contribute to a reduction of the volume of waste but also helps to conserve wood resources. In addition, products made from post-consumer papers often perform much better than products made from virgin fibre, not only from the ecological perspective but often also from the financial point of view, offering comparable properties of use.
